OBJECTIVE

Generative AI and Agentic AI Engineer with hands-on experience building Multi-Agent Systems, RAG applications, and LLM-powered solutions using Python, LangGraph, LangChain, and Streamlit. Developed AI solutions for intelligent retrieval, automation, and reasoning through internships and personal projects.

EDUCATION

Bachelor of Computer Applications

Manav Rachna International Institute of Research and Studies, Faridabad

CGPA: 7

SKILLS

Technical Skills	Python, DSA, OOPs, Machine Learning, NLP, Generative AI, Agentic AI
Frameworks & Tools	LangChain, PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Streamlit, RESTAPI, Git, GitHub
Models & Platforms	OpenAI, Llama 3/3.1, Gemini, Hugging Face, Ollama
Databases & Vector Stores	MySQL, ChromaDB, FAISS, Vector Databases
Methodologies & Techniques	Prompt Engineering, RAG, AI Agents, LLM
Cloud & Deployment	Docker, REST APIs, Model Deployment, Streamlit Cloud

EXPERIENCE

Artificial Intelligence Intern

May 2025 – June 2025

GTI Textiles, Delhi

- Developed predictive machine learning models using Python and SQL, and automated data processing workflows to support business analytics and operational decision-making.

Artificial Intelligence Intern

September 2025 – November 2025

Codec Technologies, Online

- Developed Generative AI and NLP applications using PyTorch, TensorFlow, OpenAI APIs, and Hugging Face models to automate text processing and optimize inference workflows.

PROJECTS

Multi-Agent RAG System [\[GitHub\]](#)

- Developed a Multi-Agent RAG system using Python, LangGraph, LangChain, OpenAI APIs, and ChromaDB, enabling intelligent document retrieval, semantic search, and context-aware response generation through specialized AI agents.

RAG-Based Bug Fixer [\[GitHub\]](#)

- Built an AI-powered code repair system using Python, Ollama, OpenAI GPT models, and RAG, featuring a self-correcting feedback loop for automated bug detection, debugging, and code refinement.

Cold Email Generator[\[GitHub\]](#)

- Developed a Generative AI application using LangChain, OpenAI, Hugging Face Embeddings, and ChromaDB to extract company insights from job URLs and generate personalized cold emails through semantic retrieval.

Agentic AI Job Application Bot[\[GitHub\]](#)

- Built an Agentic AI job application bot using Python, Playwright, LangGraph, and Llama 3.1 to automate ATS resume generation and job applications.
